**Subject:** Re: POHA: question on monitoring data

---

Hi Nicole:

Thanks for the quick response. We have some additional questions and a high level request to meet with POHA:

1) What's the reporting and evaluation process for the dioxin/furan sampling as required on the dredged materials intended for any of the POHA sites since 2009? And, specifically on the dredged materials that were intended and disposed of in Lost Lake, what is the process for EPA to obtain this POHA required sampling data?

2) The EPA R6 Superfund Division Director (Sam Coleman) and the EPA R6 Water Quality Protection Division Director (Miguel Flores) would like to meet with POHA sometime in March to discuss the latest developments concerning the San Jacinto site and the HSC-GB watershed. The USACE Galveston District Commander (Colonel Christopher Sallese) and the TCEQ will most likely be involved as well. Would you be the appropriate personnel to coordinate this meeting on behalf of POHA? If so, you'll be working with myself, Casey Cutler/USACE, and a personnel from TCEQ to finalize this meeting for the requestors. Let me know, thanks.

Thanks,

Stephen L. Tzhone

Subject: RE: POHA: question on monitoring data

---

Stephen,

The Port of Houston Authority does not monitor in Lost Lake for dioxin/furans, however starting in 2009 PHA has required all sediment sampling for dredge material that is intended to go into one of our sites to include dioxin/furan sampling.

Please let me know if you have any other questions.

Nicole
